

Education: Degree in Physics from University of Pisa (Italy) in 1982

Mr. Lelli is a senior project manager and consultant with long experience in design and implementation of large information systems. In Inera s.r.l., Mr. Lelli is responsible for the evolution and exploitation of the company products and solutions in the area of Cultural Heritage (Library, Archives, Museum) Information Systems. Before joining Inera, Mr. Lelli was employed as project manager in Netikos S.p.A. and Finsiel S.p.A. where he was involved in several projects, among which:

- OPAC SBN: the OPAC of the union catalogue of the national library service.
- SBN On-Line: the italian web portal to world wide Z39.50 enabled catalogues.
- Italian Cultural Heritages Network: project funded by the Cultural Heritage Ministry aiming at providing access to a network of work of art description cards databases.
- ONE-2: EC funded project (Telematics for Libraries)
- HyperMuseum: EC funded project (Telematics for Administration)
- TEL (The European Library): EC funded project belonging to the 5th Framework
- Italian Parnaso/Ecumene project about online access to ecclesiastic archives

Mr. Lelli is member of the US Z39.50 Implementers Group organised by the Library of Congress, and the CIMI (Consortium for Interchange of Museum Information) Working Group
